Software: ArcGIS, QGIS, R Studio, Microsoft Excel (Advanced), Microsoft Office, Jupyter, Snowflake, Power BI, Tableau, Visual Studio Code, Git, MySQL

Experience

City of Boston, Boston, MA — Sep 2025 – Present
Senior Evaluation and Research Fellow

- Manage and mentor a Junior Fellow with regular check-ins to assist with any roadblocks and delegate new tasks.
- Design and administer a ranked-choice lottery system for the Boston Family Days program to fairly distribute over 1,000 free performing arts tickets to families for several local shows every month.
- Develop an internal Boston Economic Report that can fetch and format data from many sources by running a single script to present a timely and nuanced view of the local economy in a national context.
- Collaborate closely with multiple internal stakeholders to design questions for the Boston Community Survey to understand how their departments can better meet the needs of constituents.
- Create a standardized data pipeline to quickly generate tailored reports for various stakeholders with relevant results from the Boston Community Survey and re-weight survey responses for more granular analysis.
- Produce several ad-hoc reports and analyses to assist with time-sensitive projects and decisions such as forecasting SNAP recipients to estimate the potential impact of lost benefits on a city and neighborhood scale.

Boston Area Research Initiative (BARI), Boston, MA — Jan 2024 – Dec 2024
Research Assistant

- Lead development and maintenance of code base to assess local disparities in climate resilience and identify drivers and policy levers.
- Created multi-level models to examine the impact of local and regional factors on heat and air pollution.
- Developed method for approximating street width using structure data to categorize the air flushing regime and estimate air pollution exposure risk.

Protiviti, Boston, MA — Aug 2021 – Dec 2022
Technical Consultant

- Designed a full suite of customer metric dashboards in Power BI to explore tabular data and visualizations that were used to help identify trends in customer behavior.
- Developed several applications using VBA for Excel to accept and process input from business users that would then enter an ETL pipeline.

Benefits Science Technologies, Boston, MA — Jul 2020 – Dec 2020
Tableau & QA Analyst

- Diagnosed and resolved production issues on clients' Tableau pages to cater to specific data needs.
- Developed reports for account managers about status of issues and delegated fixes to other teams when necessary.
- Prepared and coordinated monthly release rollout to all clients and recorded any errors to be addressed later.

Interests and Fun Facts

- I'm very passionate about urban design and transportation and love learning about its history, present, and future everywhere I go
- I am a former varsity collegiate esports athlete and I still frequently play videogames with my friends and partner
- I am an Eagle Scout and I love to hike and visit our National Parks
